

## Incident Scenario—Car vs. House

Incident Factors				
Time of Incident	Incident Location	Weather	Manpower	Equipment Needed or Responding
1430 hours	General Residential Area (Officer Inserts Address)	Overcast, 50 degrees, no wind,	Normal Assignment and manpower for scenario dispatch	To be determined by company after action plan

### Scenario

Your company is dispatched to a report of a car vs. building auto accident. The vehicle has hit a single family dwelling that was occupied at the time of the incident. The driver is still in the auto, is unconscious and the vehicle is resting part in and part out of the home. Police are on the scene and with bystanders are beginning to search the interior. You arrive and smell/hear a natural gas leak from an unknown location. You are the first-in company, what would you do?

Describe the Actions You Will Be Taking in This Incident Set your priorities, determine how you evaluate your progress, consider your follow-up or on-going responsibilities	Action Plan Outline your plan for handling this incident
